INTRODUCING DEKTON

Dekton, a combination of quartz, porcelain and glass, boasts qualities that make it one of the most durable options in the market and with over 50 colors you've got a range of choices to fit your style.

The material itself is super attractive to Designer Amy for her clients simply because of its practicality. Its strength and resistance to stains, bumps, utensils, and high temperatures is particularly suitable for outdoor kitchen areas.

It's also built for our tough climate and the high-traffic usage many of the coastal homes in our area experience during the summer season.

- High Fire and Heat Resistance
- Abrasion Resistance
- Resistance to Thawing and Freezing
- High UV Resistance
- High Scratch Resistance
- Stain Resistance
- High mechanical resistance
- Non-porous
